UPVC, or unplasticized polyvinyl chloride, is a type of plastic commonly used in the construction of windows and doors. UPVC windows and doors can be made to look like traditional wooden frames, but require less maintenance and are more energy efficient. They also have improved security features such as multi-point locking systems.

UPVC windows and doors are known for their durability, energy efficiency, and low maintenance. They are also a popular choice due to their cost-effectiveness compared to other materials such as wood or aluminum.

BENEFITS AND FEATURES UPVC OF WINDOWS

UV Resistant

Noise reduction

Thermal Insulation

Environmentally friendly

Security

Low maintenance

Energy efficiency

Durability

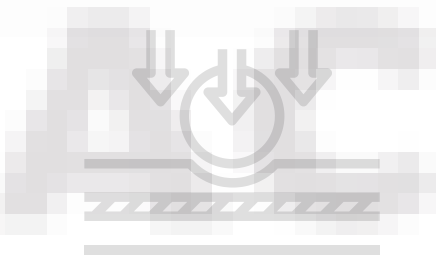

Fire Retardant

Maximum Water Tightness

UPVC (Unplasticized Polyvinyl Chloride) is a popular material used in the construction of windows and doors. It offers several features and benefits, including:

1. **Durability:** UPVC is a strong and durable material that can withstand extreme weather conditions and resist wear and tear over time.

2. **Energy efficiency:** UPVC windows and doors provide excellent insulation, keeping heat inside during the winter and reducing cooling costs during the summer. This can help lower energy bills and make your home more comfortable year-round.

3. **Low maintenance:** UPVC windows and doors require very little maintenance, making them a convenient and cost-effective option. They are easy to clean and will not rot, warp, or rust like other materials.

4. **Security:** UPVC windows and doors are designed to be secure, with multi-point locking systems that provide added protection against break-ins.

5 **Variety of design:** UPVC windows come in a range of styles and designs, so they can be used to complement a variety of architectural styles.

6. **Cost-effective:** UPVC windows and doors are a cost-effective option, as they are less expensive to manufacture than other materials such as wood or aluminum. They also have a long lifespan, which means you won't need to replace them as often.

7. **Noise reduction:** UPVC is an effective sound insulator, so UPVC windows can help to reduce noise pollution from outside.

8. **Environmentally friendly:** UPVC windows and doors are environmentally friendly because they are made of PVC which is 100% recyclable, and also energy-efficient which means that they help to reduce energy consumption.

In summary, UPVC windows and doors offer a variety of features and benefits, including durability, energy efficiency, low maintenance, security, variety of styles, noise reduction, cost-effectiveness, and environmental friendliness.

Some of the most popular window types include:

Casement windows

Casement windows: These windows have a hinge on one side and open outward like a door. They are a popular choice for bedrooms and bathrooms because they can be locked for added security.

Sliding windows

Sliding windows: Also known as slider windows or gliding windows, these windows open horizontally by sliding one sash along a track. They are a popular choice for smaller rooms or spaces because they do not take up extra space.

Tilt and Turn Windows

Tilt and Turn Windows: These windows can be opened either by tilting the top of the window inwards for ventilation or by turning the handle to open the window like a door. They are a popular choice for easy cleaning and emergency exits.

Bay windows

Bay windows: These are a combination of windows that project out from a building and create a bay inside the room. They are often used to create a more spacious feel and to add more natural light to a room.

Awning windows

Awning windows: These windows are hinged at the top and open outward like a casement window, but they are typically smaller and are often placed higher on the wall.

Picture windows

Picture windows : These windows are fixed and do not open, they are usually large and clear, allowing for maximum natural light and views

Some Common Types of UPVC Doors Include

UPVC (unplasticized polyvinyl chloride) doors are a popular choice for homes and businesses due to their durability, energy efficiency, and low maintenance requirements. There are several types of UPVC doors to choose from, including hinged doors, sliding doors, French doors, bi-folding doors, composite doors, residential doors, and commercial doors.

Each type offers unique features and benefits, from the traditional look of hinged doors to the space-saving design of sliding doors. UPVC doors are also known for their insulation properties, helping to reduce heating and cooling costs, as well as their resistance to weather, noise, and fire. Whether you're looking for a door that's secure, stylish, or energy-efficient, there's a UPVC door that's right for you.

Types of UPVC Doors Include

- Hinged doors
- Sliding doors
- French doors Bi-
- folding doors
- Composite doors
- Residential doors
- Commercial doors

Hinged Doors

Hinged doors: These are the traditional style of door, hinged on one side and opening inwards or outwards. They offer a classic look and provide easy access to your home or business.

Sliding Door

Sliding doors are an excellent option for saving space and are ideal for areas where you have limited room to open a door. They slide along a track and can be opened either from the left or right.

French Doors

French doors consist of two doors that open outwards from the middle. They are often used as a patio door or to provide access to a garden or terrace.

Bi-folding Doors

French doors consist of two doors that open outwards from the middle. They are often used as a patio door or to provide access to a garden or terrace.

Composite Doors

Composite doors are made from a combination of materials, including UPVC, wood, and insulating foam. They offer a traditional look with the durability and low maintenance of UPVC.

Composite doors: Composite doors are made from a combination of materials, including UPVC, wood, and insulating foam. They offer a traditional look with the durability and low maintenance of UPVC.

Residential doors: Residential UPVC doors are designed specifically for homes, offering both security and energy efficiency. They come in a range of styles and colors to match your home's decor.

Commercial doors: Commercial UPVC doors are designed for businesses and are often used in industrial or office settings. They offer durability and security to keep your premises safe and secure.

Available In White And More
Colors

Ultimately, selecting the right color can elevate the look of your property and improve its overall value.
